Subject: RE: Potential PA request radioactive pipe in Bristow OK
Date: Monday, February 03, 2014 12:35:43 PM

I could have misinterpreted what he was saying. Amy also spoke with this individual and from her discussions with him, the pipe did not come from the site.

He attempted to salvage oil pipe that he dug up from somewhere. The salvage facility refused it due to norm radiation. He did not realize that norm radiation in old oil pipe is a common thing, especially in Oklahoma.

Was pipe removed from Wilcox site or some other site? Was Mr. Hayes informed?

Subject: Potential PA request radioactive pipe in Bristow OK

I will get the name of the person from Bill Little tomorrow and will share with you.

Brenda:

During the Wilcox Oil Refinery Open House on 1/30/2014, one of the residents mentioned removing a pipe, taking it somewhere and that it was rejected because it was radioactive. That he could

identify where the pipe was removed. Is sort of a confusing story. I don't have the full details.

I asked the person commenting about this to identify in a map, or provide us with a more precise location, where was or were the pipe. That he could request a Preliminary Assessment (PA) and he could contact you with a precise location of the area of concern. Be on the lookout if you get a call for a PA.

Todd Downham:

Do you recall hearing this in the Open House? Do you have any further information? Do you know the name of the person who made those comments?
